Teste de Multicast Delegate para Logs

Ao carregar esta página, um **multicast delegate** foi acionado, registrando a mesma mensagem em três locais diferentes:

1. No console do servidor (verifique a janela do terminal onde você executou `dotnet run`).
2. Em um arquivo de texto na raiz do projeto (`system_log.txt`).
3. Na memória (exibido abaixo).

Logs Registrados em Memória:

[MEMORY LOG] 9/28/2025 4:57:29 PM: Operação de teste realizada com sucesso.

3 - Uso de Func com Expressão Lambda

4 - Evento de Alerta para Limite de Capacidade
