

Título: Desenvolvimento de Serviços com Spring Boot - AT

<https://github.com/guilhermecosta/INFNET/tree/master/springboot/AT>

The screenshot shows an IDE with two main panes. The top pane displays the source code for `HospitalApiApplication.java`, which is a Spring Boot application. The code includes imports for `SpringApplication` and `SpringBootApplication`, and defines a `main` method that runs the application. The bottom pane shows the Docker container logs, indicating that the application is running successfully on port 8080. The logs also show the database system being shut down and ready to accept connections.
